## Data Scientist: Assessment Round 1

Take a look at the problem statement given below and attempt to solve it using the provided [dataset](#). Please finish the task below before submitting the [Google form](#).

### **Goal:**

Develop a model to find the *variables that are significant* in the demand for shared bikes with the available independent variables and report appropriate metrics of your model evaluation.

### **Outcome:**

The variables that are significant in predicting the demand for shared bikes (at least 3).

Note: *cnt is the dependent variable*
